Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Shimada et al (US Patent No. 5,801,673).

Dupont teaches a LCD comprising a plurality of data signal lines, a plurality of data lines, a plurality of data switches, a plurality of pixels, and a plurality of capacitors (element 8 and 35) for storing data signal so that the data signal can be transmitted to the pixels simultaneously.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Dupont et al (US Patent No. 5,206,632).

Dupont teaches a LCD comprising a plurality of data signal lines, a plurality of data lines, a plurality of data switches, a plurality of pixels, and a plurality of capacitors (element 35, 36, 37) for storing data signal so that the data signal can be transmitted to the pixels simultaneously.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shimada et al (US Patent No. 5,801,673) or Dupont et al (US Patent No. 5,206,632).

Shimada et al (US Patent No. 5,801,673) or Dupont (US Patent No. 5,206,632) teaches a LCD comprising a plurality of data signal lines, a plurality of data lines, a plurality of data switches, a plurality of pixels, and a plurality of capacitors for storing data signal so that the data signal can be transmitted to the pixels simultaneously. Obviously, the device of Shimada or Dupont would have included timing control circuit in controlling the starting and ending, as well as the during time period, of the charging and precharging so as to control the operation of data flow.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Carlson (US Patent No. 4,890,101); Matsumoto et al (US Patent No. 5,400,050).
